Translator for SharePoint

Introduction

The [Translator for SharePoint](#) solution has been tested against the many native SharePoint web parts and across all custom web parts in the Accelerator 365 by Reply catalogue.

This document details which content in those web parts tested are translated.

Translation Summary – Microsoft SharePoint Apps

The table below shows which content from native SharePoint apps is supported for translation in the Translator for SharePoint solution. An in-depth view of what can be translated, including screenshots, can be found in the [Appendix](#).

Values:

Yes – Content is supported in the translation scope

Partial – Content is partially supported in the translation scope

No – Content is not supported in the translation scope

– – Not applicable to this app

Text

The **Text** web part allows you to add some text with personal formatting with links, tables, images etc. for users.

Translation status: **Translated**

Spotify

If you looked at my Spotify Wrapped summary today and concluded, "You spent a lot of 2019 being sad and/or going on long, moody walks with your headphones," you'd be correct:

Apparently, I listened to a lot of folk-pop singer-songwriter Phoebe Bridgers and her indie rock outfit, Better Oblivion Community Center. Today I was one of thousands of Twitter users (based on the hashtag [#spotifywrapped2019](#)) to post a screenshot of the streaming service's individualized end-of-year roundup — the condensing of a year's worth of data, showcasing what we pumped into our ears while we worked, commuted, cleaned the apartment, or lay in bed staring at the ceiling.

Figure 47 – Text (English)

Si vous regardiez mon résumé Spotify Wrapped aujourd'hui et concluez: « Vous avez passé une grande partie de 2019 à être triste et / ou à faire de longues promenades maussades avec vos écouteurs », vous auriez raison:

Apparemment, j'ai écouté *beaucoup* l'auteure-compositrice-interprète folk-pop Phoebe Bridgers et son groupe de rock indépendant, Better Oblivion Community Center. Aujourd'hui, j'étais l'un des milliers d'utilisateurs de Twitter (basé sur le hashtag [#spotifywrapped2019](#)) à publier une capture d'écran du résumé individualisé de fin d'année du service de streaming - la condensation d'une année de données, présentant ce que nous avons pompé dans nos oreilles pendant que nous travaillions, faisons la navette, nettoignons l'appartement ou nous allongeons lit regardant le plafond.
